DETAILED ACTION

Acknowledgement of Amendment

1. Applicant's Amendment, received September 23, 2008, is acknowledged. No claims have been added or cancelled. Claims 1-10 are currently pending.
2. Applicant's amendment to claim 3 is acknowledged. The objection to claim 3 is withdrawn.
3. Applicant's arguments have been fully considered and are persuasive.

Acknowledgement of Foreign Priority

4. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy of foreign priority application, filed on September 28, 2006, is acknowledged. The papers have been placed of record in the file.

Allowable Subject Matter

5. Claims 1-10 are allowed.
6. The following is an examiner's statement of reasons for allowance:
7. Regarding amended independent claim 1, the prior art of record discloses a light burner comprising a discharge chamber containing a gas sealed in the discharge chamber by a seal; a pair of electrode shafts, each of which partially intrudes from the seal into the discharge chamber, a wrapping, at least partially contained in the seal, freely wound around at least one of the electrode shafts; and a number of containment elements positioned along the longitudinal axis of the electrode. However, the prior art of record does not teach or suggest that the number of containment elements are configured to constrain the wrapping in its motion and allow substantial free movement

of the wrapping to expand over the electrode shaft in both radial and axial directions with the constrained motion, combined with other claim limitations.

8. Claims 2-6 are allowed due their dependency.

9. Regarding amended independent claim 6, the prior art of record discloses method of manufacturing a light burner comprising a discharge chamber closed by a seal, a pair of electrodes shafts, each of which partially intrudes from the seal into the discharge chamber, a wrapping, at least partially contained in the seal freely wound around at least one of the electrode shafts, and a number of containment elements positioned along the longitudinal axis of the electrode shaft.

10. However, the prior art of record does not teach or suggest that the number of containment elements are configured to constrain the wrapping in its motion and allow substantial free movement of the wrapping to expand over the electrode shaft in both radial and axial directions with the constrained motion, combined with other claim limitations.

11. Claims 7-10 are allowed due their dependency.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
